

I enjoy the benefits of listening to XM Satellite Radio and its traffic and weather channels. Satellite radio provides variety and quality that is not available elsewhere. I pay for these services and it should not be up to the National Association of Broadcasters to dictate what you are permitted to hear. I urge the FCC to reject the NAB's petition 04-160 and to support XM's ability to provide the kind of programming that I am willing to pay for. Standard radio service is awful and I do not listen unless I have to.
